L71	5			Surface					SR - Secondary retouch flake	Onondaga	Yes	2					
L72	29			Surface					SH - Shatter	Onondaga	Yes	11					
L73	1			Surface					SH - Shatter	Bois blanc							
L74	1			Surface					PT - Primary thinning flake	Onondaga			Yes				concave retouch on lateral margin
L75	1			Surface					BF - Biface fragment	Onondaga				14	14	3	base frag.
L76	1			Surface					BF - Biface fragment	Onondaga	Yes	1		20	18	10	crude, cortex present; missing tip
L77	1			Surface					PP - Projectile point	Onondaga				37	19	5	thin, Late Woodland triangular proj. pt., slightly concave base, missing 1 basal corner
L78	1			Surface					PP - Projectile point	Onondaga				32	16	4	Late Woodland triangular pt., broken basal corner
L79	1			Surface					PT - Primary thinning flake	Onondaga							
L80	2			Surface					SK - Secondary knapping flake	Onondaga							
L81	4			Surface					SH - Shatter	Onondaga	Yes	3					
L82	1			Surface					SR - Secondary retouch flake	Kettle point							
L83	1			Surface					SH - Shatter	Onondaga							
L84	1			Surface					GR - Graver	Onondaga			Yes	20	7	3	small, hafted graver; lateral retouch leading to graver tip
L85	8			Surface					PT - Primary thinning flake	Onondaga	Yes	3					
L86	37			Surface					SK - Secondary knapping flake	Onondaga	Yes	13					
L87	10			Surface					SR - Secondary retouch flake	Onondaga	Yes	3					
L88	55			Surface					SH - Shatter	Onondaga	Yes	34					
L89	1			Surface					PT - Primary thinning flake	Onondaga	Yes	1					
L90	1			Surface					C - Core/Core fragment	Onondaga	Yes	1		18	15	10	exhausted core
L91	2			Surface					SH - Shatter	Upper Gull R. formation							
L92	1			Surface					PT - Primary thinning flake	Kettle point			Yes				retouched area on dorsal, lateral edge
L93	1			Surface					SH - Shatter	Chalcedony			Yes				retouch on distal edge- poss. scraper frag.

## Appendix I: Flaked Lithic Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/ Fill Layer	Quad	Type	Material	Thermal Alt.	# Altered	Retouch/ Utilized	Length (mm)	Width (mm)	Thick. (mm)	Comments
L94	1			Surface					BF - Biface fragment	Onondaga	Yes	1		22	20	5	crude, incomplete bifacial flaking
L95	1			Surface					S - Scraper	Onondaga				25	19	7	scraper/ graver, distal and lateral retouch
L96	1			Surface					S - Scraper	Onondaga	Yes	1	Yes	20	17	8	unifacial scraper or biface frag.
L97	1			Surface					BF - Biface fragment	Onondaga				11	18	6	base frag.
L98	1			Surface					PP - Projectile point	Onondaga				27	20	5	Late Woodland triangular pt. w concave base, broken tip
L99	1			Surface					PPf - Projectile point fragment	Onondaga				20	24	4	Late Woodland triangular pt.w concave base, made on a flake w incomplete bifacial flaking
L100	1			Surface					PPf - Projectile point fragment	Onondaga				15	10	3	tip frag.
L101	1			Surface					BF - Biface fragment	Onondaga	Yes	1		17	15	5	prob. frag. from a biface
L102	6			Surface					PT - Primary thinning flake	Onondaga	Yes	1					
L103	1			Surface					PT - Primary thinning flake	Bois blanc							
L104	67			Surface					SK - Secondary knapping flake	Onondaga	Yes	24					
L105	15			Surface					SR - Secondary retouch flake	Onondaga	Yes	7

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G1	1		Midden 1	Backdirt					Slate	Bannnerstone		Half					84	120	12	one half of a winged bannerstone made of Huronia banded slate, broken at the central perforation. After it had broken there was an attempt to perforate bannerstone at the top and bottom near the fractured central perforation. On one face the upper perforation was started, while the beginning of the lower hole is evidenced by a slight depression. On the opposite face etching on the upper portion only matched the unfinished perforation on the other side. These holes may have been for suspension after the bannerstone broke or may have represented mending holes. Surface of the item has numerous parallel scratches and striations perpendicular to the tool's axis are evident in the central perforation.
G2	1	499-124	Midden 1	One metre unit	topsoil				Chloride Schist	Celt		Bit		Polished						bit fragment/spall
G3	1			Backdirt					Chloride Schist	Celt		Bit		Polished						laminar bit fragment. may have been removed by impact, polish on surface
G4	1			Backdirt					Chloride Schist	Celt		Bit		Polished						polished bit fragment with thermal alteration
G5	1			Backdirt					Chloride Schist	Celt		Bit		Polished						polished bit flake /spall possibly removed by impact
G6	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment thermally altered and fire cracked. exterior polished
G7	1	475-230		One metre unit	ploughzone				Chloride Schist	Celt		Midsection								polished celt midsection fragment
G8	1	350-175			topsoil				Chloride Schist	Celt		Midsection								celt midsection fragment thermally altered and fire cracked
G9	1	496-123	Midden 1		topsoil				Chloride Schist	Celt		Bit		Polished						Bit spall flake. Probably removed on impact. Exterior polished surface
G10	1	535-175				PM #4	4		Chloride Schist	Axe		Bit		Polished				34	22	Bit portion of a small axe. Bit edge battered. Thermally altered, fire cracked and found in post
G11	1	520-185				PM#6			Chloride Schist	Axe		Bit		Polished				51	33	bit section of a chloride schist axe. Bit polished and honed. Broken at midsection
G12	1	497-115	Midden 1				topsoil		Limestone	Misc	Yes						55	45	13	small flat ovoid pebble with lateral notching. Looks like a notched netsinker but much smaller
G13	1	496-122	Midden 1				topsoil		Chloride Schist	Celt		3 Quarters	Yes	Polished			61	18	13	celt portion sheared along one face. Appears to have been used following fracture at bit area as evidenced by use polish on the fractured face. May have been reused as a wedge.
G14	1	335-180				156	fill	SE	Chloride Schist	Celt		Poll			Battered					poll section of a large chloride schist celt. Broken transversely. Polished with bevelled edges on one face. Poll appears battered
G15	1	475-240				PM#37A			Chloride Schist	Celt		Poll								poll fragment of a chloride schist celt. Thermally altered, firecracked and found in a post mold
G16	1	496-121	Midden 1				topsoil		Granite	Hammer	Yes						62	53	40	small pink granite ovoid cobble hammer with one hammer facet and no grip pitting
G17	1	496-121	Midden 1				topsoil		Limestone	Hammer	Yes						120	100	38	flat ovoid cobble hammer with grip facet on one face and multiple hammer facets on the lateral margins. A potion of one face has been removed probably due to impact. Made on a fossiliferous limestone cobble. One face appears polished possibly due to use
G18	1		north of 440 line	Backdirt					Chloride Schist	Celt		Midsection								portion of a large chloride schist celt with bit broken transversely surface polish
G19	1		north of 440 line	Backdirt					Chloride Schist	Celt		Bit		Polished						chloride schist bit fragment. Possibly a flake removed by impact
G20	1		north of 440 line	Backdirt					Chloride Schist	Celt										celt fragment with exterior polish
G21	1		south palisade	Backdirt					Chloride Schist	Celt		Midsection								midsection fragment of chloride schist celt. Thermally altered and fire cracked
G22	1		south palisade	Backdirt					Chloride Schist	Celt		Midsection								chloride celt midsection fragment. Thermally altered and fire cracked
G23	1		south palisade	Backdirt					Chloride Schist	Celt		Midsection		polished						celt fragment
G24	1	335-140				118	fill		Granite	Hammer	Yes						98	92	43	hammer made on a round flat granite cobble. shallow grip facets and multiple hammer facets on lateral margins. One face appears to have been ground flat. Bipitted depressions
G25	1		south palisade	Backdirt					Chloride Schist	Axe		Bit		Polished						bit portion of a chloride schist axe. remaining section of bit polished and honed
G26	1		south of palisade	Backdirt					Chloride Schist	Celt		Bit								chloride schist celt bit fragment. Probably removed by impact. Exterior polish
G27	1	498-119	midden 1				ash		Gneiss	Hammer	Yes						64	60	32	small pebble hammer with no grip facets. multiple hammer facets and several large flake scars emanating from lateral margins - maybe from impact
G28	1	335-180				146	fill		Chloride Schist	Celt		Poll								poll fragment of large chloride schist celt. shaped and polished poll with flattened end. May have fractured from impact

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing- Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G29	1	375-145			ploughzone				Chloride Schist	Celt		Midsection								midsection portion of a large chloride schist celt. Exterior polish. missing dorsal surface, poll and bit
G30	1	530-170				709			Granite	Hammer							77	61	46	hammer made on an ovoid pink granite cobble. centrally placed pit grip roughening on both faces. Multiple hammer facets along lateral margins. Bipitted depressions
G31	1	390-175				475	fill	NE	Sandstone	Grinding Stone										Fragment of a large red sandstone grindstone. a small portion of a depressed grinding surface is present on one face.
G32	1	340-170				PM#12	fill		Chloride Schist	Celt		Poll								Poll and midsection of chloride schist celt missing bit and portion of ventral surface. Poll is tapered and well formed. Appears to be thermally altered and fire cracked. Found in a post mold.
G33	1	499-120	Midden 1				ash/ charcoal		Gneiss	Hammer	Yes						56	50	24	small ovoid pebble hammer with grip pit on one face and grip roughening on the other face. Hammer facets locate at both ends. Bipitted depression
G34	1	335-180				156	fill	SW	Limestone	Hammer	Yes						77	64	34	hammer made on an ovoid limestone cobble. No pit grips. Multiple hammer facets and pecking on the lateral margins
G35	1	340-120				PM#38	fill		Chloride Schist	Axe		Half		Polished			90	44	35	medium sized axe consisting of approx half the item. It is highly oxidized and fire cracked. Found in a post mold
G36	1	497-120	Midden 1				ash/ charcoal		Diorite	Hammer	Yes						75	52	46	pebble hammer made on an ovoid cobble. Hammer facets at both ends. No grip facets.
G37	1	497-120	Midden 1				ash/ charcoal		Gneiss	Misc										misc ground stone spall flake with surface polish
G38	1	497-120	Midden 1				ash/ charcoal		Chloride Schist	Celt										thermally altered celt fragment with some exterior polish
G39	1	497-120	Midden 1				ash/ charcoal		Chloride Schist	Celt		Poll								fragment or flake from a chloride schist celt poll. May have been driven off celt on impact
G40	1	365-160			surface				Chloride Schist	Axe	Yes			Polished	Battered		94	38	17	small chlorite schist axe with broken or battered poll. Large flake removed from bit, comprising approx half the bit. Remaining portion is polished and honed. Slight taper towards poll and surface polish through out.
G41	1	475-145				1043	fill		Chloride Schist	Axe		1 Quarter		Polished			86	28	22	portion of a chloride schist axe. Longitudinal split including bit and lateral side. Bit polished and honed. May have been used after it had been broken
G42	1	465-240				55	trench fill		Slate	Bead	Yes						22	20	7	slate disc. May be a preform for a discoidal stone bead. No evidence of perforation on either face. Lateral margins are rough
G43	1		Backdirt						Chloride Schist	celt	no	Midsection								small celt fragment
G44	1	435-180				427	fill	5	Chloride Schist	Celt		Poll					118	56	28	poll and midsection portion of a large chloride schist celt. Rough exterior and poll. May be an unfinished celt
G45	1	498-119	Midden 1				topsoil		Chloride Schist	Chisel	Yes			Polished	Battered	Yes	61	18	13	small chloride schist chisel with symmetrical polished and honed bit.
G46	1	340-165				PM#41	fill		Chloride Schist	Celt	No	Midsection		Polished						midsection fragment of a large chloride schist celt. Surface polish
G47	1	498-119	Midden 1				topsoil		Chloride Schist	Axe		Bit		Polished						bit corner fragment from a large axe. Bit is polished and honed. Thermally altered
G48	1	360-160		Surface					Chloride Schist	Axe		Bit		Chipped						bit portion of a large chloride schist axe. Bit polished and chipped, fractured along the long axis and broken transversely.
G49	1	395-140				552	fill		Limestone	Hammer	Yes									hammer made on a fossiliferous limestone cobble with multiple hammer facets represented by large flakes removed at the four corners of the tool
G50	1	340-190			topsoil				Chloride Schist	Celt										dorsal fragment from a large chloride schist adze
G51	1	465-240				55	trench fill		Chloride Schist	Celt		Midsection								midsection portion from a large chloride schist celt
G52	1	499-119	Midden 1				ash/ charcoal		Chloride Schist	Celt										chloride schist midsection with portion of bit. Extremely battered piece which may have been used as a wedge
G53	1	499-119	Midden 1				ash/ charcoal		Chloride Schist	Celt	Yes						80	38	13	roughly finished small celt or chisel. Smooth dorsal surface, roughly flaked lateral margins and asymmetrically bevelled bit. Poll is rough and unfinished. May be unfinished tool
G54	1	420-125				PM #2			Chloride Schist	Celt		Midsection								celt midsection fragment found in Post Mold #2
G55	1		Backdirt						Chloride Schist	Celt		Midsection								celt midsection fragment. Possible secondary use as a graver
G56	1	385-386				368	fill		Chloride Schist	Chisel				Polished						corner bit portion of chisel or small celt that appears to have broken during use. Remnant portion of bit is polished and honed.
G57	1	330-120			surface				Chloride Schist	Celt		Midsection								celt midsection fragment
G58	1	497-123	Midden 1				topsoil		Chloride Schist	Celt		Bit		Polished						celt bit fragment. May have been removed by impact
G59	1	497-123	Midden 1				topsoil		Chloride Schist	Celt										celt fragment with surface polish
G60	1	395-195				486	fill		Chloride Schist	Celt		Midsection								polished midsection fragment
G61	1	385-190				373			Chloride Schist	Axe		Bit		Polished						corner fragment of axe bit. Bit polished and honed
G62	1	420-210				PM#15	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with surface polish
G63	1	460-245				55 (trench)	fill		Chloride Schist	Celt		Midsection								celt midsection portion that is burnt and fire cracked

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G64	1		Backdirt south of 350 line						Chloride Schist	Celt		Midsection								midsection of a chloride schist celt missing bit and poll. Appears battered
G65	1	340-120				76	fill		Chloride Schist	Axe		Bit		Polished						axe bit corner fragment. honed and polished
G66	1		surface (csc)						Chloride Schist	Celt		Bit		Polished						
G67	1	340-120				76	fill		Shale	Pendant	Yes						21	17	4	unfinished shale pebble pendant. Perforation begun but not completed on both faces
G68	1	400-190				PM#20	surface		Shale	Misc							72	40	19	four sided "conical" or pyramidal shape with blunted apex. Made of black shale and exhibiting scarification on surface consisting of parallel scratching. Base has two parallel grooves. Suggestive of a stone effigy such as a canined head but may be an eccentric object
G69	1		surface (csc)						Chloride Schist	Axe	Yes			Polished	Battered		104	51	23	rough celt with honed symmetrical bit. Bit is the only finished part of this complete item
G70	1		surface (csc)						Chloride Schist	Celt		Midsection								midsection portion of a chloride schist celt
G71	1		surface (csc)						Chloride Schist	Celt		Midsection					122	47	23	battered celt midsection missing poll and bit part of one lateral margin missing. May have been used as a wedge
G72	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment. Some surface polish
G73	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment
G74	1		surface (csc)						Chloride Schist	Celt		Midsection								dorsal midsection-bit fragment of a large celt. Polish on exterior surface
G75	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G76	1		surface (csc)						Chloride Schist	Celt		Poll	Yes		Light Wear	Yes				poll portion of a large chloride schist celt. Tapers towards poll with pecked constricted section encircling the end of the poll
G77	1		surface (csc)						unidentified	Chisel		Bit		Chipped			50	30	13	chisel mad of unknown material possibly burnt chloride schist. Parallel sided with symmetrical bit blunt and chipped
G78			surface (csc)						Chloride Schist	Axe		Bit		Polished						axe bit corner portion. Honed and polished
G79	1		surface (csc)						Chloride Schist	Chisel		Bit		Polished						bit portion from a chloride schist chisel. Bit polished and honed
G80	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment
G81	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment
G82	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment
G83	1		surface (csc)						Chloride Schist	Celt		Midsection								celt fragment
G84	1		surface (csc)						Chloride Schist	Celt		Midsection								midsection portion
G85	1		surface (csc)						Chloride Schist	Adze		3 Quarters	Yes	Chipped			101	34	18	chloride schist adze base on asymmetric bit which is chipped. Broken transversely at haft. Polish on bit and on lateral margins
G86	1		surface (csc)						Chloride Schist	Celt		Bit								bit fragment from a large chloride schist celt
G87	1		surface (csc)						Chloride Schist	Celt		Midsection								celt midsection fragment
G88	1		surface (csc)						Chloride Schist	Axe		Bit		Chipped						approximately half of a bit portion of a chloride schist axe. Bit polished but chipped
G89	1		surface (csc)						Chloride Schist	Celt		Bit		Polished						chloride schist celt corner bit portion. Bit polished
G90	1	503-156	midden-like concentration 3						Chloride Schist	Celt		Midsection								celt midsection fragment. Burnt and firecracked
G91	1	503-156	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment
G92	1					810	Fill		Chloride Schist	Celt		Bit		Polished						bit fragment. corner portion probably detached during use. The bit is polished and honed
G93	2		Midden 1				top of subsoil		unidentified	Whetstone							89	33	17	rectanguloid shaped whetstone possibly made of Arkansas stone. Two pieces mended together. Appears to relate to the Euro-Canadian occupation.
G94	1	504-155	midden-like concentration 3				fill		Chloride Schist	Celt										celt fragment with surface polish
G95	1	497-119	Midden 1				topsoil		Chloride Schist	Celt		Bit								battered bit portion missing edge
G96	1	498-121	Midden 1				ash/ charcoal		Chloride Schist	Celt		Midsection								midsection fragment with surface polish
G97	1	497-122	Midden 1				topsoil		unidentified	Pendant							15	12	6	small pebble pendant. Perforation appears natural. May be non cultural but retained or used as a curio
G98	1	498-119	Midden 1				ash/ charcoal		Limestone	Pendant	Yes						27	17	10	pebble pendant appears to have natural perforation may have been kept or worn as a curio
G99	1	498-119	Midden 1				ash/ charcoal		Chloride Schist	Celt		Bit								celt bit fragment with polish
G100	1	502-161	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G101	1			Surface					Chloride Schist	Celt		Bit								bit fragment
G102	1			Surface					Chloride Schist	Celt		Bit		Polished						celt bit corner portion. Appears to be thermally altered
G103	1			Surface					Chloride Schist	Celt		Bit								bit fragment

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing- Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G104	1			Surface					Chloride Schist	Celt		Bit		Polished						corner bit portion. Polished and honed
G105	1			Surface					Chloride Schist	Celt		Midsection								midsection fragment that has been thermally altered
G106	1			Surface					Chloride Schist	Celt		Midsection								midsection fragment
G107	1			Surface					Chloride Schist	Celt		Midsection								midsection fragment
G108	1			Surface					Soapstone	Pipe										small fragment of a steatite pipe bowl rim with vertical incising and the upper remnants of deep vertical grooves
G109	1			Surface					Chloride Schist	Adze		Bit		Chipped						bit portion of adze. Most of the bit edge has been removed probably from impact probably due to adze like action. Bit polished and slightly chipped
G110	1			Surface					Chloride Schist	Celt		Midsection								celt midsection missing end of poll and bit portion. Tapers towards poll and polished on dorsal side with some lateral bevelling. Breaking of poll and bit may be related to secondary use as a wedge
G111	1			Surface					Chloride Schist	Chisel		Bit		Polished				34	11	bit portion of a chloride schist chisel. Bit is symmetrical, polished and honed
G112	1			Surface					Chloride Schist	Axe		Half		Polished		Yes		39	24	approx half of small axe with symmetrical bit. Bit polished and honed
G113	1			Surface					Chloride Schist	Celt		Midsection								small celt midsection missing poll and bit. surface mostly exfoliated. Battered condition is suggestive of tool having a secondary function as a wedge
G114	1			Surface					Chloride Schist	Axe		3 Quarters						55	26	medium sized axe made of chloride schist missing poll and most of the bit. Small remnant of bit is present and symmetrical. Rest of the bit has snapped off. Midsection is well formed smoothed over its entire surface
G115	1			Surface					Chloride Schist	Celt		Midsection								celt midsection portion with remnant bit. Polish in bit area. Thermally altered and possibly fire cracked
G116	1			Surface					Chloride Schist	Chisel	Yes		Yes	Polished	Light Wear	Yes		35	15	complete chisel with symmetrical bit that is polished and has a series of small chips on the edge. Rectanguloid midsection tapers towards poll and appears unfinished and crude. Poll is rough and unfinished
G117	1			Surface					Chloride Schist	Axe		Bit		Polished						bit corner portion from a large chloride schist axe. bit symmetrical polished and honed
G118	1			Surface					Chloride Schist	Axe		Bit		Polished				61	15	bit portion from a relatively thin chloride schist axe. Symmetrical bit is polished and honed. Transverse/diagonal fracture
G119	1			Surface					Chloride Schist	Celt		Bit		Polished						bit portion that appears to have been removed on impact much like G109, detaching the bit edge from the celt probably a result of impact. Bit polished and honed
G120	1			Surface					Chloride Schist	Celt		3 Quarters			Light Wear	Yes				chloride schist celt consisting of midsection and poll. surface is rough and unfinished with light wear on the poll. Midsection tapers towards poll
G121	1			Surface					Chloride Schist	Celt		Midsection								midsection fragment of a large celt
G122	1	502-157	midden-like concentration 3		fill		fill		unidentified	Misc										possible soapstone bead preform but material may not be soapstone. appears smoothed on one side
G123	1			Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with surface polish
G124	1			Surface					Chloride Schist	Misc										misc piece of tabular trianguloid schist with edge polish
G125	1			Surface					Chloride Schist	Celt		Poll			Battered					Poll portion of chloride schist celt that has surface polish and has been thermally altered
G126	1	380-175			topsoil				Chloride Schist	Celt		Poll			Light Wear					Poll section of a chloride schist celt. Poll is polished and flat at the end, It is thermally altered and fire cracked
G127	1			Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G128	1			Surface					Chloride Schist	Adze		Bit		Chipped				53	27	bit from a chloride schist adze based on asymmetrical bit. Polished with edge chipped. Transverse break, probably from use
G129	1			Surface					Chloride Schist	Celt		Poll			Light Wear			41	16	
G130				Surface					Chloride Schist	Celt		Bit		Chipped						bit portion of a chloride schist celt. Bit is polished and honed with some chipping at the edge
G131	1	503-162	midden-like concentration 3				fill		Chloride Schist	Celt		Bit		Polished						bit portion detached from chloride schist celt, possibly in adzing action
G132	1	524-150	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								celt midsection portion with exterior surface smoothing
G133	1	525-141	midden-like concentration 2				charcoal		Chloride Schist	Celt		Bit		Polished						small bit corner from chloride schist celt, polished and honed

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G134	1	504-152	midden-like concentration 3				fill		Chloride Schist	Celt		Bit		Battered				44	14	bit portion of chloride schist adze. Appears to be battered possibly related to secondary use as a wedge
G135	1	526-146	midden-like concentration 2				charcoal		Chloride Schist	Chisel	Yes		Yes	Polished	Light Wear		74	38	13	complete chloride schist chisel with honed and polished symmetrical bit. Ventral side of bit slightly concave. Tapers gently towards poll. polish on bit half of tool suggests that it may have been hafted
G136	1	521-140	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								midsection lateral margin fragment
G137	1	506-158	midden-like concentration 3				fill		Chloride Schist	Celt		Bit		Polished						celt bit corner honed and polished. May have detached from celt by adzing motion
G138	1	506-158	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment with surface polish
G139	1	506-158	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment with surface polish
G140	1	506-158	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment mends with G139
G141	1	503-156	midden-like concentration 3				fill		Shale	Bead	Yes						11	11	4	complete black shale discoidal bead. bidirectional perforation
G142	1	502-157	midden-like concentration 3				Fill		Shale	Pipe		Half					42	30		half of an unfinished black shale pipe bowl that may have been broken while being manufactured. This is a vasiiform pipe bowl. An unfinished stem perforation on one lateral margin and an unfinished suspension hole on the base. The bowl itself has been roughed out. Possibly during the process of hollowing out the bowl, the pipe split. It may have been discarded at this point, however, a hole may have been drilled into the missing side of the bowl`s base as evidenced by the base of a perforation. A series of horizontal incised lines are located on the edges of the pipe, four on the side with the pipe stem bore, 2 above and 2 below and five incised line on the opposing side.
G143	1	502-157	midden-like concentration 3				fill		Shale	Bead	Yes						19	18	3.5	complete and finished black slate bead found in same unit as black slate pipe. Ovoid to pound in shape with bidirectional central perforation. polished
G144	1	502-158	midden-like concentration 3				fill		Limestone	Misc		Half								possible limestone bead portion but may be natural
G145	1		midden-like concentration 3				surface		Chloride Schist	Chisel		Half		Chipped		Yes	47	26	11	rough chloride schist chisel. Rectanguloid piece of schist has beveled end forming a crudely made bit part of which is honed and polished. Rest of tool appears crude and unfinished
G146	1	505-159	midden-like concentration 3						Limestone	Pipe										limestone pipe bowl rim fragment. Burnt, approx. 10mm in thickness
G147	1	505-159	midden-like concentration 3				Fill		Chloride Schist	Celt		Bit								chloride schist bit fragment burnt and fire cracked
G148	1	370-200		surface					Chloride Schist	Celt										midsection fragment of chloride schist celt with surface polish
G149	1	501-162	midden-like concentration 3				topsoil		Chloride Schist	Adze		3 Quarters		Chipped			104	73	35	large chloride schist adze probably broken during use evidenced by a transverse break at right angle to the tools axis, probably broken at haft. ventral face of bit appears concave. Bit is chipped and dull suggesting perhaps secondary use as a wedge
G150	1	501-162	midden-like concentration 3				fill		Limestone	Hammer		3 Quarters						89	37	most of a flat ovoid limestone cobble with multiple hammer facets and central grip roughening on both faces
G151	1	525-144	midden-like concentration 2				charcoal		Sandstone	Bead	Yes						24	24	13	large complete pink sandstone bead. Bidirectional perforation and a series of incised lines encircling the outer edge of the bead
G152	1	375-155			ploughzone				Chloride Schist	Celt		Bit								chloride schist celt bit portion
G153	1	515-190		Surface					Chloride Schist	Celt		Half		Battered				38	16	portion of a chloride schist celt bit battered. Item may have been used as a wedge
G154	1	504-165			topsoil				Gneiss	Celt		Bit								large bit fragment from a gneissic celt

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G155	1	527-149	midden-like concentration 2				fill		Sandstone	Whetstone	Yes						82	50	14	small complete sandstone whetstone. Concave surfaces on opposing faces.
G156	1	527-149	midden-like concentration 2				fill		Chloride Schist	Celt		Midsection								celt midsection fragment
G157	1	496-187			ploughzone				Chloride Schist	Celt		Half	Yes	Battered	Light Wear		135	47		Chloride schist celt missing ventral surface and just a remnant of the bit. Dorsal surface polish, including poll. May have split during use
G158	1	504-157	midden-like concentration 3						Chloride Schist	Celt		Bit		Chipped						celt bit portion. Bit edge chipped and dull
G159	1	504-157	midden-like concentration 3				fill		Limestone	Misc										polished limestone fragment, possibly derived from pipe bowl
G160	1	504-157	midden-like concentration 3				fill		Chloride Schist	Celt										celt fragment with exterior polish
G161	1	504-157	midden-like concentration 3				fill		Shale	Bead	Yes						13	13	3.5	complete black shale disc or bead preform. Slight depression on one face may be beginning of perforation
G162	1	504-154				fill			Chloride Schist	Celt		Midsection								midsection fragment of a large chloride schist celt. Burnt and firecracked
G163	1	524-151	midden-like concentration 2				charcoal		Chloride Schist	Celt		Bit		Polished						celt bit corner portion. Polished and honed
G164	1	524-151	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G165	1	490-160				PM#45	fill		Chloride Schist	Axe		Half	Yes	Battered		Yes	0	54	31	chloride schist axe with extremely battered bit. Appears to have been reused after it had broken. post break pecked depressions on both lateral margins appear to be an attempt to haft the tool for reuse. Found in a post mold (#45)
G166	1	525-146	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								midsection fragment with exterior polish. Dorsal has a pronounced spine or apex. Burnt and fire cracked
G167	1	525-146	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								midsection fragment with exterior polish
G168	1	523-145	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								chloride schist celt midsection portion with exterior polish
G169	1	445-125		Surface		125			Chloride Schist	Celt		Poll			Light Wear					Poll section of a chloride schist celt. Thermally altered and fire cracked
G170	1	528-148	midden-like concentration 2				fill		Limestone	Whetstone		Half								whetstone fragment with smoothing on both faces. Made on a small water worn limestone cobble
G171	1	522-141	midden-like concentration 2				charcoal		Chloride Schist	Chisel		1 Quarter		Polished						bit midsection portion of a chloride schist chisel. Approximately half of the symmetrical bit which is honed and polished remains. May have been thermally altered
G172	1	521-141	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								midsection fragment with exterior polish
G173	1	470-250				38	fill			Fossil	Yes									crinoids fossil
G174	1	504-160	midden-like concentration 2				plough zone		Slate	Bead	Yes						13	12	8	complete Huronia banded slate bead. Round shape with bidirectional perforation. Polished smooth
G175	1	430-235	2003 Excavation Trench	Surface					Chloride Schist	Axe		Bit		Polished				53		bit of chloride schist axe. Portion of bit honed and polished. Burnt and fire cracked
G176	1	523-144	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								chloride schist celt midsection fragment with polish on one lateral margin
G177	1	502-162	midden-like concentration 3				fill		Granite	Hammer	Yes						57	52	27	small granite cobble/pebble hammer with grip roughening on one face with a single hammer facet
G178	1	526-150	midden-like concentration 2				plough zone		Chloride Schist	Adze		Half		Polished				46	21	bit and midsection of chloride schist adze. asymmetrical bit is polished and honed. Transverse break, probably broken at haft

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	North-ing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G179	1	526-150	midden-like concentration 2				Plough zone		Chloride Schist	Celt		Midsection								celt midsection fragment that has been thermally altered and fire cracked. Exterior polish
G180	1	523-142	midden-like concentration 2				charcoal		Limestone	Hammer	Yes						73	73	32	hammer made on a fossiliferous limestone cobble with grip roughening on one surface and a single hammer facet. Scratching on one surface. One facet
G181	1	523-142	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G182	1	522-152	midden-like concentration 2				charcoal		Diorite	Hammer	Yes						62	62	29	diorite cobble hammer with grip roughening on one surface and multiple hammer facets along entire lateral margin.
G183	1	390-175				475	fill	NE	Sandstone	Whetstone										sandstone whetstone fragment with smoothing on one surface
G184	1	496-186					plough zone		Chloride Schist	Celt		Midsection								chloride celt midsection portion, tapering towards poll
G185	1	504-159	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish. Burnt
G186	1	521-144	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								midsection fragment with exterior surface polish
G187	1	521-144	midden-like concentration 2				charcoal		Sandstone	Pendant	Yes						24	22	9	sandstone pebble with natural perforation. May have been used as a pendant or curated as a curio
G188	1	505-153	midden-like concentration 3				fill		Chloride Schist	Celt		Bit								bit fragment with polish
G189	1	525-147	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish. Thermally altered
G190	1	525-147	midden-like concentration 2				charcoal		Limestone	Pendant	Yes						34	31	20	limestone pebble pendant with natural perforation. May have been used as a pendant but may have been curated as a curio
G191	1	523-140	midden-like concentration 2				charcoal		Granite	Hammer	Yes						54	54	30	small cobble hammer with possible grip roughening on one surface and hammer facets on lateral margins
G192	1	390-175				475		nw	unidentified	Bead		Half					19		4.5	half of a discoidal stone bead made of unidentified material, possibly steatite
G193	1	505-159	midden-like concentration 3				fill		Sandstone	Misc	Yes						9	9	3	small sandstone disc, possibly a bead preform
G194	1		test pits in woodlot area		topsoil				Shale	Misc	Yes						17	15	3	black shale disc possibly a bead preform
G195	1	335-180				156		nw		Fossil	Yes									crinoids fossil
G196	1	330-150		Surface					Chloride Schist	Chisel	Yes		Yes	Polished	Light Wear		62	26	15	complete chloride schist chisel with honed and polished symmetrical bit. remainder of tool appears rough and unfinished. Tapers towards poll and may have been hafted
G197	1	320-170		Surface					Chloride Schist	Chisel	Yes			Polished	Light Wear		85	74	36	complete chloride schist chisel with honed and polished symmetrical bit. Well formed with polish over entire surface. tapers towards poll
G198	1	320-170		Surface					Chloride Schist	Adze		Bit		Chipped				33	17	small adze asymmetrical bit broken transversely. honed edge with a large flake removed. Thermally altered
G199	1	524-143					charcoal layer		Chloride Schist	Celt		Bit		Chipped						chloride schist bit corner fragment. polished and dulled or chipped
G200	1	390-200		Surface					Chloride Schist	Celt		Bit								celt bit fragment, possibly impact flake
G201	1	340-160		Surface					Chloride Schist	Celt		3 Quarters	Yes		Battered	Yes		52	27	poll and midsection portion. Bit broken transversely, may have been broken at haft. Dorsal & ventral surfaces rough with polished lateral margins. Notched slightly at haft. Flat ventral surface, with transverse break suggests may have functioned as adze
G202	1	360-190		Surface					Granite	Misc	Yes						37	37	15	large pink granite disc, possibly a bead preform or a gaming piece. smoothed over entire surface with small centrally placed holes on both faces. These may be the start of bidirectional perforation.
G203	1	360-190		Surface					Chloride Schist	Celt		Midsection								midsection fragment with exterior polish
G204	1	360-190		Surface					Chloride Schist	Celt		Midsection								midsection fragment from large celt with exterior polish
G205	1	360-170		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G206	1	370-150		Surface					Chloride Schist	Axe		Bit		Chipped				57	31	bit and partial midsection portion of a large chloride schist axe. Symmetrical bit is chipped. Axe was in the process of being reworked - post use pecking on bit and a shallow, diagonal groove has been made on one face

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G207	1	370-150		Surface					Chloride Schist	Celt		Bit		Polished						Bit corner fragment from a large celt. honed and polished
G208	1	370-150		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G209	1	360-160		Surface					Slate	Celt		Bit								bit fragment of a slate celt. finely honed and polished bit edge. May be from earlier period
G210	1	350-170		Surface					Chloride Schist	Celt		Midsection								midsection fragment with exterior polish
G211	1	350-190		Surface					Chloride Schist	Celt		Bit		Polished						bit portion of a chloride schist celt
G212	1	350-150		Surface					Chloride Schist	Celt		1 Quarter		Chipped						celt midsection with portion of bit. Bit polished and chipped
G213	1	350-150		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment
G214	1	340-180		Surface					Chloride Schist	Celt		1 Quarter		Battered						longitudinal portion of chloride schist celt consisting of midsection and bit. Bit is battered and item may have been broken when used as a wedge
G215	1	340-180		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G216	1	370-190		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G217	1	505-165				PM #14	fill		Chloride Schist	Celt							82	42	7	celt midsection with bit portion that may have been reworked into a woodworking tool. working edge appears to have been bevelled after original tool had been broken
G218	1	505-200				PM #4	fill		Chloride Schist	Axe		Bit		Polished						bit corner of a large axe, symmetrical bit polished and honed
G219	1	410-145				PM #2			Chloride Schist	Celt		Bit		Chipped				45		bit portion of a chloride schist celt, possibly derived from and adze. Bit edge is chipped and item thermally altered. Found in post mold
G220	1	390-220		Surface					Chloride Schist	Celt		Poll			Light Wear			48	16	celt poll portion. relatively flat and tapering towards end. Light wear on poll and Transverse break
G221	1	400-210		Surface					Chloride Schist	Celt		Midsection								celt midsection portion near bit end. Thermally altered and fire cracked
G222	1	400-210		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment
G223	1	400-210		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment, burnt
G224	1	550-180				PM #47	surface		Biotite	Celt		Midsection								celt midsection fragment, material appears to be biotite
G225	1	530-170				709	fill		Chloride Schist	Celt		Midsection								midsection fragment with exterior polish. Burnt
G226	1	465-210				PM#8	fill		Chloride Schist	Celt		3 Quarters			Battered			54	44	Large chloride schist celt missing bit. Poll battered as is bit end. Found in a Post Mold
G227	1	470-140				PM#27	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish found in post mold
G228	1	480-210				PM #51	fill		Chloride Schist	Celt		Bit		Polished						polished bit fragment from celt, possibly an impact flake. Found in post mold
G229	1	415-135				PM #9			Chloride Schist	Celt		Midsection								Chloride schist midsection fragment. Thermally altered and fire cracked. Found in a post mold from house 56/57 which has no evidence of burning
G230	1	475-155				PM #11	fill		Chloride Schist	Celt		Midsection								chloride schist celt midsection fragment found in post mold and thermally altered
G231	6	480-205				PM#33	fill		Chloride Schist	Celt		Bit		Polished						chloride schist celt bit portion, polished and shattered consisting of 6 mendable pieces. Bit polished. Found in post mold
G232	1	500-155				1053	fill		Chloride Schist	Celt		Bit		Polished						Chloride schist celt bit fragment exhibiting polish and thermal alteration
G233	1	504-155	midden-like concentration 3				fill		unidentified	Adze		Bit		Polished				36	17	bit of a small adze made of unknown material but may be dolomite. Asymmetrical Bid edge polished and honed
G234	1	340-150		Surface					Chloride Schist	Celt		Midsection								Midsection dorsal portion of a large chloride schist celt. Exterior surface polish
G235	1	380-150		Surface					Chloride Schist	Celt		Bit		Battered						celt bit fragment missing bit edge
G236	1	380-160		Surface					Chloride Schist	Chisel	Yes			Chipped			43	19	5	small complete chloride schist chisel with chipped asymmetrical bit. Bit exhibits polish and slight bi-lateral notching indicates hafted tool. Bit polish anterior to haft
G237	1	380-160		Surface					Chloride Schist	Celt		Bit		Polished						bit fragment with polish
G238	1	380-160		Surface					Chloride Schist	Celt		Midsection								chlorite schist celt midsection fragment exhibiting thermal alteration
G239	1	497-119	Midden 1				ash/ charcoal		Chloride Schist	Adze	Yes		Yes	Chipped	Battered	Yes	109	47	20	complete chloride schist adze with chipped asymmetrical bit. slight lateral depressions related to hafting. Poll appears rough and may have been battered. Surface polish is present over much of the item
G240	1	380-180		Surface					Chloride Schist	Celt		Midsection								chloride schist celt midsection portion. Appears to be thermally altered
G241	1	380-180		Surface					Chloride Schist	Celt		Midsection								chloride schist celt midsection fragment
G242	1	400-190		Surface					Chloride Schist	Celt		Midsection								chloride schist celt midsection portion with some exterior polish related to use
G243	3	400-190	CSC (10 m 2)						Chloride Schist	Celt										3 chloride schist celt fragments with polish
G244	1	370-130				SP#2	surface		Limestone	Pipe	Yes						34	30	28.5	small pipe bowl with finished stem and bowl perforations, incomplete horizontal incising near top of bowl. Made from a chalky limestone ovoid pebble. Exhibits pecking and possible pigment is present on outer surface.

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing- Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G245	1		CSC						Limestone	Pipe		1 Quarter								limestone pipe bowl rim fragment
G246	1	498-119	Midden 1				topsoil		Shale	Bead	Yes									complete discoidal shale bead with unidirectional central perforation and surface polish
G247	1	496-121	Midden 1				ash/ charcoal		Shale	Bead	Yes						11	11	4	shale discoidal bead or disc. polished on surface with no perforation. May not have been a bead blank as it appears finished
G248	1	498-121	Midden 1				topsoil		Shale	Bead	Yes						13	13	5	unfinished discoidal shale bead. polished and shaped with unfinished conical perforations on both sides
G249	1	515-228				709	fill		Shale	Pendant		3 Quarters								thin rectangular pendant with a single bi-directional drill hole
G250	1	498-120	Midden 1				ash		Shale	Bead	Yes						13	13	3.5	discoidal shale bead preform or gaming piece. No perforation, but surface polish. One surface has some flakes removed,
G251	1	498-120	Midden 1				ash		Shale	Bead	Yes						17	17	3	shale disc with no perforation and considerable surface polish. Margins exhibit scratching probably related to shaping. May be a bead preform but polish suggests it may have been used as a gaming piece.
G252	1				fill	158			Chloride Schist	Chisel		Bit								bit portion of a chloride schist chisel. Symmetrical honed bit, missing one corner
G253	1	450-135							Chloride Schist	Axe	Yes		Yes	Polished	Light Wear		70	37	13.5	small chloride schist axe with honed and polished symmetrical bit. Tapers towards poll with lateral flakes probably related to hafting. Poll appears unfinished rather than battered. Small size suggests use as a fine woodworking tool
G254	1	380-190		Surface					Chloride Schist	Chisel	Yes		Yes	Polished	Light Wear		59	22	11	complete chloride schist chisel with polished symmetrical bit which has been dulled by grinding. lateral flakes removed to facilitate haft which is also evident due to lack of polish towards poll. Poll appears unfinished rather than battered
G255	1	380-190		Surface					Chloride Schist	Celt		Bit		Polished						polished bit fragment from a large chlorite schist celt
G256	1	380-190		Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish
G257	1	545-140				PM #10	fill		Chloride Schist	Axe		Bit						61	28	bit portion of a chloride schist axe. symmetrical chipped bit with transverse break across midsection
G258	1	385-185				375	surface		Chloride Schist	Axe		3 Quarters	Yes	Polished	Battered		118	53	32	the majority of or a complete chloride schist axe. Bit and portion beyond haft highly polished and bit edge finely honed. Rough below haft poll either battered or tool incomplete. Parallel sided, no taper towards haft
G259	1	522-147	midden-like concentration 2				charcoal		Limestone	Pipe										highly fossiliferous limestone pipe bowl section. Broken above stem perforation which appears conical. Bowl is out flaring with slight collar at top of rim. Fossils are found throughout piece which has a distinctive white colour
G260	1	475-240				55 (trench)	fill		Shale	Bead	Yes						13.5	98	46	complete discoidal shale bead with unidirectional central perforation
G261	1	450-200				PM#10	fill		Granite	Hammer	Yes						120	98	46	large cobble hammer made on ovoid cobble with a single hammer facet. No grip facets. Found in a post mold
G262	1	475-140				994	fill		Chloride Schist	Adze		Half		Polished				43	24	approximately half of chloride schist adze with bit and portion of midsection. asymmetrical bit polished and honed
G263	1	502-157	midden-like concentration 3				fill		Chloride Schist	Axe		Bit		Chipped						bit section from a chloride schist axe. Bit polished and chipped detached from axe along dorsal plain
G264	1			Surface					Sandstone	Pendant	Yes						25	19	8	possible pebble pendant with natural perforation, likely non-cultural
G265	1			Surface					Chloride Schist	Axe		Bit		Polished						bit section from a small axe. polished and honed
G266	1			Surface					Chloride Schist	Celt		Midsection								celt midsection fragment showing exterior polish and thermal alteration
G267	1	370-195				238	fill	NE	Chloride Schist	Celt		Midsection								celt midsection with a portion of bit. Appears to have been battered, possibly used as a wedge
G268	1	410-115				687	fill		Shale	Bead	Yes						10	9	2	small discoidal shale bead. Unidirectional perforation
G269	1	410-115				687	fill		Chloride Schist	Adze	Yes			Chipped			104	47	30	complete but broken small chloride schist adze. Asymmetrical bit is polished and chipped along the edge. Tapers towards poll
G270	1	400-140		Surface					Chloride Schist	Celt		Bit		Polished						polished bit fragment
G271	1	499-122					ash/ charcoal		Slate	Pendant		Half						24	7	Pebble pendant made of orange red slate. Has two notches on one lateral margin and a bidirectional perforation. Bottom portion has been broken off. Surface polish, possibly from use wear
G272	1	521-143	midden-like concentration 2				charcoal		Chloride Schist	Celt		Midsection								midsection fragment with exterior polish
G273	1	450-210					surface		Slate	Bead	Yes						9	9	2.5	small discoidal black shale bead with bidirectional perforation
G274	1	530-195				709	fill		Chloride Schist	Celt		Midsection						43	37	large celt midsection portion. Rectanguloid in cross section with exterior polish
G275	1		North Palisade		topsoil				Chloride Schist	Celt		Midsection						66	29	large celt midsection with polish on lateral margins

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G276	1	530-160				709	fill		Chloride Schist	Celt										celt midsection fragment with exterior polish and burnt
G277	1	530-160				709	fill		Chloride Schist	Celt										celt midsection fragment with exterior polish and burnt
G278	1	530-160				709	fill		Chloride Schist	Celt		Bit								celt bit corner section with honed bit edge and evidence of burning
G279	1	530-175				709	fill		Chloride Schist	Celt		Midsection						32	19	small celt midsection with evidence of burning
G280	1	530-180				709	fill		Chloride Schist	Celt		Bit								polished celt bit portion fire cracked and burnt
G281	1	530-180				709	fill		Chloride Schist	Celt		Midsection								celt midsection fragment burnt and firecracked
G282	1	520-180				748	fill		unidentified	Chisel	Yes		Yes	Polished	Light Wear		74	24	8	complete chisel with symmetrical polished and honed bit. Tapers towards poll and appears to have been hafted based on polish towards working end. Unknown black metamorphic stone
G283	1	520-155				766	fill		Limestone	Misc		Half					20		9	approximately half of a limestone pebble with a large natural hole in the centre. Appears to be natural but may have been curated as a curio
G284	1	460-220					surface		Chloride Schist	Celt		Midsection								celt midsection fragment fire cracked and burnt
G285	1	470-130					surface		Chloride Schist	Celt		Bit								celt bit corner fragment, polished
G286	1	470-170					surface		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish
G287	1	410-170					surface		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish
G288	1	480-170			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish, fire cracked and burnt
G289	1	410-180			surface				Chloride Schist	Celt										
G290	1	410-190			surface				Chloride Schist	Celt		Midsection								celt midsection portion, dorsal section
G291	1	410-190			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G292	1	410-190			surface				Sandstone	Bead	Yes						12.5	12	6	complete red sandstone bead with bidirectional perforation
G293	1	450-190							Chloride Schist	Chisel		Half		Polished				20	5.5	bit portion of a chloride schist chisel. Bit is polished and honed with a keen edge
G294	1	450-190			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G295	1	450-190			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G296	1	460-170			surface				Chloride Schist	Celt		Bit		Polished						bit corner fragment from large chloride schist celt. Bit polished
G297	1	440-210			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish. firecracked and burnt
G298	1	410-220			surface				Shale	Pendant	Yes						19	17	3	small black shale ovoid pebble pendant with centrally placed unidirectional perforation. reversed side appears to be exfoliated
G299	1	420-120			surface				Chloride Schist	Celt		Midsection								midsection fragment from large celt. Exterior surface polish
G300	1	440-190			surface				Chloride Schist	Celt		Midsection								chloride schist celt midsection portion with partial bit section. battered
G301	1	440-190			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish and burnt
G302	1	440-150			surface				Chloride Schist	Axe	Yes		Yes	Polished	Battered		90	44	14	small thin axe with symmetrical polished bit, poll is battered. These tools are probably specialized wood working tools rather than for chopping trees. Battered poll and low profile suggest it may have been used for splitting boards or for rough shaping
G303	1	450-200			surface				Chloride Schist	Celt		3 Quarters			Battered			43	32	celt missing bit portion appears to be fire cracked and burnt. Tapers to poll which has been battered
G304	1	420-140			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G305	1	420-170			surface				Chloride Schist	Celt		Midsection								celt dorsal midsection portion with exterior polish
G306	1	420-130			surface				Chloride Schist	Celt		Bit		Polished						chisel or celt bit fragment, possibly an impact flake
G307	1	450-220							Chloride Schist	Chisel		Bit		Polished						chisel bit section. large quartz intrusion
G308	1	420-150			surface				Chloride Schist	Celt		3 Quarters			Light Wear			32.5	16	small celt missing bit. Appears to have been battered, large flake removed from poll end, possibly used as wedge. Tapers towards poll
G309	1				surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G310	1	526-145	midden-like concentration 2				charcoal layer		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish, burnt
G311	1	526-145	midden-like concentration 2				charcoal layer		Shale	Bead	Yes						20	20	6	complete black bead preform gaming disc. Exhibits use wear polish but no centrally placed perforation. However, it is likely a finished item. One surface is partially exfoliated, this appears to be post depositional - no polish present in exfoliated area
G312	1	430-200			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with polish
G313	1	420-220			surface				Chloride Schist	Celt		Midsection								celt midsection fragment
G314	1	430-130			surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish
G315	1	430-130			surface				Chloride Schist	Celt		Midsection								portion of a celt midsection with exterior polish. Battered item
G316	1	503-158	midden-like concentration 3				Fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish and thermal alteration

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G317	1	504-155	midden-like concentration 3				Fill		unidentified	Celt		Midsection								celt midsection fragment made of amphibolites or hornblend
G318	1	505-158	midden-like concentration 3				Fill		Shale	Bead	Yes						12.5	11	2	small red shale disc, possibly bead preform without any evidence of central perforation. May be gaming piece
G319		515-220				709	Fill		Chloride Schist	Celt		Midsection								small celt fragment
G320	1	505-155	midden-like concentration 3						Chloride Schist	Celt		Bit		Polished						celt bit corner fragment, large with surface polish
G321	1	365-130				341	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G322	1			Backdirt					Chloride Schist	Axe		Bit		Chipped				57	21	chloride schist bit portion probably broke during use. polished symmetrical bit with small chips along edge
G323	1			Backdirt					Chloride Schist	Adze		Bit		Battered						adze corner bit portion with battered asymmetrical bit
G324	1			Backdirt					Chloride Schist	Chisel	Yes		Yes	Chipped			71	34	9	complete chloride schist chisel with chipped symmetrical bit. Polish towards bit end suggest that the tool was hafted. Tapers towards poll
G325	1			Backdirt					Chloride Schist	Celt		Poll			Battered					poll section of a large celt. Flattened ventral surface and polish along tapering poll
G326	1			Surface					Chloride Schist	Celt		Bit								bit corner fragment of large celt
G327	1			Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G328	1			Surface						Fossil										portion of large fossil. Non cultural
G329	1	385-170			topsoil				Chloride Schist	Celt		Midsection								midsection fragment with exterior polish
G330	1	330-180		One metre unit	surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G331	1	380-130			surface				Chloride Schist	Axe		Bit		Chipped						bit corner from a large chloride schist axe. Bit polished but chipped
G332	1	530-170				709	fill		Shale	Bead	Yes						4.5	4.5	2	small discoidal black shale bead. polished on one face, exfoliated on one face. Bidirectional perforation.
G333	1	530-185				709	fill		Chloride Schist	Celt		Bit		Polished						celt corner bit portion, honed and polished, possibly an axe
G334	1	530-165				709	fill		Limestone	Pendant	Yes						41.5	30	14	amorphous limestone pebble with a centrally located natural perforation. May be non cultural but appears to have surface polish
G335	1	499-119	Midden 1				ash/ charcoal		Shale	Pipe										2 portions of a black slate pipe bowl. Decoration on upper area of bowl consisting of oblique incised lines above two incised horizontals
G336	1	470-185				PM #13	fill		Soapstone	Bead	Yes						9	8	3.5	small complete green steatite bead with high polish
G337	1	530-165				709	fill		Chloride Schist	Celt		Bit		Battered						bit portion of a battered chloride schist celt
G338	1	530-165				709	fill		Chloride Schist	Celt		Midsection								celt midsection portion with exterior polish
G339	1	530-165				709	fill		Chloride Schist	Celt		Midsection								celt midsection fragment
G340	1	530-165				709	fill		Chloride Schist	Axe		Bit		Battered						axe bit potion. battered, thermally altered and fire cracked
G341	1	530-165				709	fill		Limestone	Hammer	Yes						88	85	40	limestone cobble hammer with centrally placed grip pitting on one face and grip roughening on the opposite face. Multiple hammer facets on the lateral margins. Bipitted depressions.
G342	1	530-165				709	fill		Limestone	Hammer	Yes						95	88	38	hammer made on a flat ovoid limestone cobble with no grip pitting or roughening. Multiple hammer facets
G343	1	530-165				709	fill		Granite	Hammer		Half								approximately half of cobble hammer, not enough to determine presence of grip pitting. one hammer facet
G344	1	520-190		One metre unit	surface				Chloride Schist	Axe	Yes			Polished	Battered		106	44	17	complete small chloride schist axe with symmetrical honed and polished bit. Exfoliated on one surface. Appears to have been hafted
G345	1	390-150		One metre unit	surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G346	1	560-170			plough zone				Gneiss	Hammer	Yes						93	60	38	hammer made on ovid gneiss cobble. Slight grip roughening on one surface. Well defined hammer facets on opposing lateral margins and at end of hammer
G347	1		along road, top of creek valley	Surface					Chloride Schist	Celt	Yes			Battered	Light Wear	Yes	142	55	35	large complete celt with partially missing battered bit. Smooth polished exterior surface on dorsal surface. Appears to be an adze but mush of the bit missing
G348	1	490-220				PM #51	fill		Granite	Hammer	Yes						91	86	48	large granite cobble hammer with well defined grip pits on both faces. Appears to have been flattened on both surfaces. Single hammer facet. Found in Post mold. Bipitted depressions
G349	1	480-190		One metre unit	surface				Chloride Schist	Chisel		Midsection								chloride schist chisel midsection fragment
G350	1	490-170		One metre unit	surface				Chloride Schist	Chisel		Bit		Polished						chisel bit section. Symmetrical bit polished and honed
G351	1		north of line 500	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

G352	1	490-180		One metre unit	surface				Chloride Schist	Celt		Bit		Polished						celt bit spall flake. May have been removed by impact. Bit edge honed and polished
G353	1	480-160		One metre unit	surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G354	1	490-210		One metre unit	surface				Sandstone	Misc	Yes						19.5	19	5	complete sandstone disc with no evidence of central perforation. May have been a gaming piece
G355	1			Surface					Chloride Schist	Celt		Midsection								small celt fragment
G356	1			Surface					Chloride Schist	Celt		Poll			Battered					poll section of a large chloride schist celt. surface is polished although large flakes have been removed possibly due to impact
G357	1	530-210		One metre unit	surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G358	1	515-220		Surface					Chloride Schist	Celt		Poll			Light Wear					poll section of a large chloride schist celt
G359	1	400-150			surface				Chloride Schist	Celt		Bit								polished bit fragment
G360	1	400-150			surface				Chloride Schist	Celt		Bit								celt bit fragment
G361	1	470-220		One metre unit	surface				Chloride Schist	Axe		Bit		Chipped				39	22	bit section of a small chloride schist axe. Bit edge dull and chipped
G362	1		CSC	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G363	1		CSC	Surface					Chloride Schist	Celt		Bit								celt bit flake
G364	1		CSC	Surface					Chloride Schist	Celt		Bit								portion of celt bit fragment
G365	1	470-190		One metre unit	surface				Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G366	1		CSC	Surface					Chloride Schist	Celt		Poll								poll section from a large celt
G367	1		CSC	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish, thermally altered and fire cracked
G368	1		CSC	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G369	1		CSC	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G370	1		CSC	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G371	1		CSC	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G372	1	480-150		10 m unit	CSC				Chloride Schist	Celt		Poll					116	36	28	poll fragment with exterior polish
G373	1	480-150		10 m unit	CSC				Chloride Schist	Axe	Yes			Polished			100	42	14	small axe. Symmetrical bit, polished and honed. rectangular shaped with work confined to the bit area.
G374	1	480-150		10 m unit	CSC				Chloride Schist	Celt		Bit								celt bit fragment
G375	1	475-135				997	fill		Granite	Hammer	Yes						104	100	46	Hammer made on a granite cobble with centrally placed grip pitting on one surface and grip roughening on the other face. Appears to have been ground along lateral margins to form round object. Multiple hammer facets along lateral margins. Bipitted depressions
G376	1	445-200				455	fill		Chloride Schist	Axe		Half						43	22	small chloride schist axe consisting of approximately half of working end of axe with ground bit edge. Thermally altered and fire cracked
G377	1	675-155				1044	fill	NE	Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G378	1	550-170				PM#23	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish found in post mold
G379	1	475-145				1038	fill		Granite	Hammer										hammer fragment made on granite cobble. Single observable hammer facet
G380	1	475-155				1044	fill	NW	Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish. Thermally altered and fire cracked
G381	1	506-159	midden-like concentration 3				fill		Chloride Schist	Celt		Poll	Yes		Battered	Yes				poll portion of a chloride schist celt. Well-defined haft near poll. Lateral constriction have been pecked on both sides to create haft.
G382	1	503-153	midden-like concentration 3						Chloride Schist	Chisel	Yes		Yes	Chipped	Light Wear		81	28	15	chloride schist chisel made on a rough piece of material, bit polished and honed, may be partially damaged. Rest of the tool has not been modified
G383	1		Midden I	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish
G384	1	445-200				1458	fill		Granite	Hammer	Yes						77	70	30	hammer made on a flat ovoid pink granite cobble. Centrally placed grip roughening on one face, none on the obverse face. Two hammer facets on the lateral margins
G385	1	390-195				346	FILL	SE	Diorite	Axe		Bit		Polished				60	38	Bit section of a large diorite axe. symmetrical bit is polished with a honed edge. polish on exterior of tool except for bit surface which shows grinding probably related to sharpening
G386	1	495-180				960	fill		Limestone	Pendant	Yes						44	30	18	limestone pebble with a natural perforation, may have been used as a pendant or may have been retained as a curio. Appears to have use wear polish on the exterior
G387	1	495-180				960	fill		Shale	Bead	Yes						13	12	2.5	complete black shale discoidal bead with small bidirectional perforation. Exterior polish. Friable

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing- Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G388	1	465-155				1250	L1 First deposit		Limestone	Hammer		Half								approx half of a limestone cobble hammer. Appears to have some grip pitting but incomplete. Continuous hammer facet along lateral margins
G389	1	505-180				844	fill		Chloride Schist	Celt		Bit								celt bit corner fragment
G390	1	470-220				1374	fill		Chloride Schist	Chisel	Yes			Chipped	Battered		84	30	11	complete chloride schist chisel with symmetrical bit which is polished but chipped smoothed and polished on dorsal surface but rough ventral surface. Poll is rough and appears to be unfinished
G391	1	460-145				1221	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G392	1	460-145				1221	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish, thermally altered and fire-cracked
G393	1	465-190				1252	fill	1		Fossil	Yes									small crinoids fossil may be natural or curated
G394	1	465-190				1252	fill	1		Fossil	Yes									crinoids fossil, may be natural or retained as a curio
G395	1	460-160				1256	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish, thermally altered and fire cracked
G396	1	450-150				1317	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G397	1	503-157	midden-like concentration 3				fill		Limestone	Pendant	Yes						32	23	12	ovid limestone pebble with natural perforation. Surface polish on one surface suggests it may have been used as a pendant or kept as a curio
G398	2	503-157	midden-like concentration 3				fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G399	1	490-200				984	fill		Granite	Hammer	Yes						48	45	23	pink granite pebble hammer with centrally placed grip pitting one surface. Two hammer facets on the lateral margins
G400	1	470-145				1045	fill		Limestone	Hammer	Yes						116	111	41	hammer made on a large fossiliferous limestone cobble with centrally placed grip pitting on one side, absent on obverse side. Multiple, almost continuous hammer facets along lateral margins. Two large impact flakes have been removed along the margins
G401	1	480-175				1068	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish, a small portion of the distal part of the bit is also present
G402	1	470-215				1379	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G403	1	485-165				1089	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish. Thermally altered
G404	1	480-210				1173	fill		Chloride Schist	Celt		Poll								poll portion of a chloride schist celt. transverse break and thermally altered, possibly fire cracked
G405	1	465-155				1250	fill	4	Slate	Bannerstone										fragment of a Huronia Banded slate bannerstone
G406	1	485-165				1092	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G407	1	485-165				1092	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish, Thermally altered and fire cracked
G408	1	485-160				1080	fill		Shale	Bead	Yes						14	14	2	complete thin black shale disc, may be bead preform as there is not surface polish
G409	1	360-150				323	fill		Chloride Schist	Axe		3 Quarters		Chipped	Battered		190		28	large chloride schist axe that was split along the longitudinal axis. Bit chipped and poll battered. Bar shaped tool with thermal alteration which occurred after the tool split
G410	1	360-150				323			Chloride Schist	Bevelled Tool	Yes						156	46	14	the ventral portion of a chloride schist celt that has been reworked into a bevelled tool, probably used to scrape hides. the piece was beveled along one lateral margin. As the edge is has been bevelled and ground it was probably used to scrape hides.
G411	1	440-130				1409	fill		Chloride Schist	Celt		3 Quarters			Battered			54	33	medium size chloride schist celt missing bit which was removed by a transverse fracture. Tapers gently towards poll which is rough and unfinished
G412	1	440-130				1409	fill		Chloride Schist	Celt		Midsection						61	25	midsection portion of a large chloride schist celt
G413	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G414	1		CSC						Chloride Schist	Celt		Poll								chloride schist celt poll fragment
G415	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G416	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G417	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish with thermal alteration
G418	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G419	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with small proximal portion of polished bit. Exterior polish
G420	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G421	1		CSC						Chloride Schist	Axe		Bit		Chipped						bit fragment of a large chloride schist axe. Symmetrical Bit edge chipped
G422	1		CSC						Limestone	Misc	Yes						60	55	14	limestone cobble spall flake with possible unifacial retouch on edge opposite striking platform

Appendix K: Mantle Site (AIGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing-Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G423	1		CSC						Chloride Schist	Hammer	Yes						60	52	20	small pebble hammer made on a flat water worn chloride schist pebble. Centrally placed grip roughening on one surface and no modification on opposite face. One facet
G424	1		CSC						Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G425	1	505-175				908	fill		amphibolites	Axe	Yes			Battered	Battered	Yes	93	48	26	small axe made of amphibolites. bar shaped and smoothed over entire surface. symmetrical bit battered and poll also battered may have been used as a wedge
G426	1	495-180				957	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with small portion of bit and exterior polish. Thermally altered and fire cracked
G427	1	426-147							Granite	Hammer	Yes						88	84	42	hammer made on a round pink granite cobble. Centrally placed grip roughening on both faces. Single hammer facet on lateral margin. Bipitted depressions
G428	1	350-215				85	fill		amphibolites	Celt		Poll								split poll portion of a celt made of amphibolites. exterior polish on tapering finished poll
G429	1	500-185				878	fill		Sandstone	Hammer	Yes						98	83	49	hammer made on a sandstone cobble with grip roughening on both sides and two hammer facets on margins. one side of cobble appears to be flattened and smooth - may have been used as a mano or may be naturally flat
G430	1	500-160				1048	fill		Chloride Schist	Celt		Bit								celt bit fragment with exterior polish
G431	1	499-123	Midden 1				topsoil		Shale	Bead	Yes						15	15	3	grey shale discoidal bead with laminar fracture creating two pieces. Bidirectional central perforation. May be grey coloured due to thermal alteration
G432	1	496-124	Midden 1				topsoil			Fossil	Yes									crinoids fossil, may be natural or retained as a curio
G433	1	505-185				862	fill		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G434	1	505-185				862			Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G435	1	515-160				795	fill		Granite	Hammer	Yes						77	75	35	hammer made on a round pink granite cobble. Grip roughening on one face, large flake removed from the opposite face negates ID of obverse. As this flake scar extends to lateral margin it may have obscured hammer facets.
G436	1	515-225				709	blak charcoal		Chloride Schist	Axe		Half		Battered				60	30	working end half of large axe, transverse break. Bit battered, may have been used as a wedge for splitting wood
G437	1	515-225				709	black charcoal		Chloride Schist	Celt		Bit								bit splinter from a chloride schist celt. Thermally altered and fire cracked
G438	1	515-225				709	black charcoal		Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish. Thermally altered and fire cracked
G439	1	498-125	Midden 1						Limestone	Misc	Yes						36	36	36	a completely round limestone pebble with pitting. May be a pebble hammer or may have been retained as a curio
G440	1	497-122			topsoil				Shale	Bead	Yes						14	12	4	complete black shale discoidal bead with bidirectional central perforation
G441	1	497-123			topsoil				Shale	Bead	Yes						10	9.5	2	complete black shale discoidal bead with slightly offset bidirectional perforation. Rounded edges
G442	1	515-220				709			Sandstone	Misc										notched
G443	1	515-220				709			Limestone	Celt		Midsection								celt midsection fragment with exterior polish
G444	1	505-175				PM #2	fill		Granite	Hammer	Yes									hammer made on a flat circular pink granite cobble. Centrally placed Grip roughening on both faces. Multiple hammer facets along lateral margins. Bipitted depressions
G445	1	505-170				PM #1	fill		Diorite	Hammer	Yes						108	100	44	trianguloid diorite cobble hammer with well defined centrally placed grip pit on one side and central grip roughening on the obverse. Multiple hammer facets along lateral margins. Unpitted
G446	1		505N	Backdirt					Chloride Schist	Celt		Midsection					92	90	40	celt midsection fragment with exterior polish and thermally altered
G447	1	470-205				PM #4	fill		Chloride Schist	Celt		Half								chloride schist celt preform. Shaped but with no further modification. Found in a post mold
G448	1	500-220				PM# 23	fill		Chloride Schist	Celt		Bit		Polished						bit corner portion. Bit honed and polished. Thermally altered and fire cracked. Found in post mold
G449	1			Backdirt					Chloride Schist	Adze		Bit		Chipped				37	20	bit end of a small chloride schist adze with polished and chipped asymmetrical bit. Transverse break and thermally altered
G450	1			Backdirt					Chloride Schist	Celt		Bit								celt bit fragment with exterior polish and thermally altered
G451	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G452	1		425 North Line	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G453	1		425 North Line	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish and thermally altered
G454	1		425 North Line	Backdirt					Chloride Schist	Bevelled Tool	Yes			Polished			65	62	11	piece of a chlorite schist celt that has been reworked in to a bevelled tool, possibly for scraping hides or woodworking
G455	1		505 North line	Backdirt					Chloride Schist	celt		bit								small symmetrical bit fragment with polish on exterior surface
G456	1		505 North line	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior surface polish
G457	1	480-210				1165	fill			Fossil										crinoids fossil, may be natural or retained as a curio
G458	1	480-210				1165	fill			Fossil										crinoids fossil, may be natural or retained as a curio

Appendix K: Mantle Site (AlGt-334) Ground Stone Artifact Catalogue

Cat #	Qty	Northing- Easting	Area	Sub-Area	Layer	Feature	Feature/Fill Layer	Quad	Material	Type	Complete	Portion	Haft	Bit Wear	Poll Wear	Pecked	Length (mm)	Width (mm)	Thick. (mm)	Comments
G459	1	325-180				47	fill			Fossil										cephalopod fossil. May be natural or retained as a curio
G460	1	490-200	CSC (10 m 2)	Surface					Chloride Schist	Celt		Midsection								celt midsection fragment
G461	1	370-200		surface					Chloride Schist	Celt		Midsection								celt midsection fragment
G462	1	490-190		surface					Chloride Schist	Axe		3 Quarters								large chloride schist axe missing its poll end. Honed bit and bevelled on both lateal margins. Exterior polish on surface.
G463	1	450-200				1377	fill		Granite	Hammer	yes									hammer made on a cobble with grip roughening on one side and one hammer facet. One side of cobble appears to be flattened and smooth - may have been used as a mano or may be naturally flat
G464	1	500-200				894	fill		Chloride Schist	Axe		3 Quarters								large chloride schist axe with large flake removed from medial portion near bit. Exterior polish on surface.
G465	1	530-200				709	fill		Chloride Schist	Chisel		3 Quarters								small chloride schist chisel with symmetrical polished and honed bit.
G466	1	525-147			charcoal				Chloride Schist	Axe		3 Quarters								small axe. Symmetrical bit, polished and honed. Rectangular shaped.
G467	1		510 Line	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish and thermally altered
G468	1		510 line	Backdirt					Chloride Schist	Celt		Bit		Polished						celt bit fragment, polished and honed
G469	1		525 line	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish and thermally altered
G470	1		535 line	Backdirt					Chloride Schist	Celt		Poll								Poll portion of a celt. Rough with little modification
G471	1	420-185		ploughzone					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G472	1		530 line	Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G473	1			Backdirt					Granite	Hammer							77	70	34	pebble hammer made on pink granite cobble with hammer facets on opposing ends and no grip roughening
G474	1			Backdirt					Granite	Pecking Tool	Yes						89	40	39	pointed cylindrical cobble with modification at the pointed conical end. Possibly a pecking tool
G475	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G476	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G477	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G478	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G479	1			Backdirt					Chloride Schist	Celt		Midsection								celt midsection fragment with exterior polish
G480	1		CSC	Surface					Chloride Schist	Chisel		Bit								small chloride schist chisel with chipped asymmetrical honed bit. Bit exhibits polish as does midsection. Both lateral margin are bevelled on one face.
G481	1		CSC	Surface					Slate	Pendant	yes									black slate pebble pendant preform. No hole has been drilled into the piece. Polish is present on the surface
G482	1	497-115	Midden 1						unidentified	Preform	Yes									discoidal bead preform. One surface is domed while the other is flat. A single hole has been started on the flat surface. Domed surface exhibits polish and several deep flakes have been removed along one edge. Flakes may represent damage to piece and piece was then discarded or no longer useful as a bead preform.
G483	1	500-123	Midden 1						steatite	Pipe	Yes	bowl		Polished						A complete vasiform pipe bowl, made of light brown steatite. Round stem perforation, below is a suspension perforation. patches of lime mortar present on surface likely from construction of mill structure wall in Midden 1, a symmetrical polish pattern present on one third of the pipe. Bowl is rectangular in cross section with rounded corners, and the lip of the bowl is flat with decoration on a short collar consisting of four single horizontal incisions and short vertical incisions at the corners.

1. To make the table easier to read, taxonomic categories group certain and uncertain (cf.) identifications.

2. MNI is calculated first at the species level. Then, any additional individuals represented in the genus- or family-level identifications are added at those levels in the table. The aggregation unit is the entire site (minimum distinction method).

Appendix N - Table 2: Recent and Intrusive Animal Bone by Context

Context	Feature #	NISP	Comments
		4	
		2	large mammal longbone shaft frag; appearance suggests sunbleached/recent
CSC		44	
CSC		1	
CSC		2	
Features	4	1	
Features	28	9	
Features	49	108	mostly one fetal/newborn calf, with few bones from a second calf and some chicken
Features	72	13	sheep/goat/deer innominate, very bleached
Features	117	1	
Features	156	1	
Features	156	1	young chicken? femur with extensive rodent gnawing
Features	167	128	adult pig cranium frags., plus vert, ribs, tibia from younger naimal
Features	335	145	cow cranium
Features	335	1	cow femur epiphysis prox; slightly singed, so perhaps part of historic site?
Features	385	1	cow lumbar vertebra
Features	401	258	fetal/newborn pig
Features	420	616	fetal/newborn cow
Features	422	1118	fetal/newborn cow and very young pig
Features	458	1	cow rib
Features	459	100	multiple mouse/vole skeletons
Features	473	254	turkey & chicken
Features	562	610	major portion of fetal/newborn calf
Features	671	20	major portion small rodent MNI2
Features	673	161	immature pig (only distal humerus fused)
Features	701	87	recent-ish dog with pathology on vertebrae
Features	764	1	
Features	921	1	cow metapod
Features	922	534	major portion of one woodchuck and one porcupine
Features	930	1	
Features	969	12	major portion of rodent skeleton
Features	977	284	major portion of young pig + 1 v young smaller animal longbone

Appendix N - Table 2: Recent and Intrusive Animal Bone by Context

Context	Feature #	NISP	Comments
Features	1049	1	mouse/vole skull
Features	1080	22	major portion of mouse/vole
Features	1132	1	vole? Skull complete
Features	1203	287	cat burial
Features	1285	1	mouse/vole; recent on patina
Features	1340	1	axe cut
Features	1374	1	small rodent cranium intact
Features	1392	1	cow vert
Features		1	mouse/vole cranium Major portion
Features	146 trench	1	
Features	146 trench	1	Mandible sheep/deer
Features	55 trench	1	small equid?
Features	709 trench	1	
Features	709 trench	246	major portion of dog skeleton, recent; larger breed, adult male (baculum present). too small for wolf; distal phalanges suggest dog, as does extensive osteoarthritic bone malformation
Features	709 trench	48	toad and frog/toad longbones and innominates
Features	709 trench	270	very complete and clearly recent (not all bone 100% non-organic) dog burial, adult, pathological ulnae and vertebrae
Features	709 trench	2	vole skulls
Features	85 trench	5	
Features	85 trench	1	bird longbone; patina suggests recent
Features	927b	2	
Midden 1		451	
Midden 1		2	
Midden 1		5	
Midden 1		51	including deer that's been butchered with saw
Midden 1		46	including deer ulna and innominate that's been butchered with saw
Midden 1		5	pig cranium
Midden 2		127	
Midden 2		4	
Midden 2		15	incl. 14 bones from very young bird, incl. phalanges; completeness suggests recent
Midden 2		1	recent based on condition, Marmota maxilla
Midden 2		6	teeth

<b>Unit:</b> 500-123				
<b>Layer:</b> topsoil				
1181	1	unidentified	indeterminate metal	
1182	1	unidentified	metal, ferrous	indeterminate circular metal fragment; 11/16" diameter
1183	1	metal plating	metal, white	1" diameter circular metal plate fragment, either back or front of unknown object
1184	1	strapping	metal, white	
1185	1	unidentified	metal, iron	
1186	1	door strike plate	metal, ferrous	
1187	1	screw	metal, ferrous	5/16" diameter and 1.5" long roundhead slot screw
1188	3	fence wire	metal, ferrous	
1189	18	nail, machine cut	metal, ferrous	
1190	2	nail, hand-wrought	metal, ferrous	
1361	1	smoking pipe	white ball clay	undecorated pipe bowl fragment
1362	1	button	brass	14.4 mm (5/8 inch) diameter plain brass button with fastener
1363	1	button	ceramic	10.7 mm (1/2 inch) diameter 4-holed prosser button
1520	460	window glass	glass	
1521	1	container, unidentifiable	glass	tiny colourless container glass fragment
1522	1	container, unidentifiable	glass	tiny, colourless container glass fragment with indeterminate white painted pattern
1523	1	container, unidentifiable	glass	aqua container glass fragments
1524	1	container, unidentifiable	glass	aqua torpedo container glass basal portion
1525	1	container, unidentifiable	glass	tiny aqua container glass finish fragment
1526	5	lamp chimney	glass	tiny aqua chimney glass fragments
2599	1	smoking pipe	white ball clay	pipe bowl fragment decorated with probable turk's head
